

PROFESSIONAL SERIES - 2K AEROSOL

WE USE HIGH QUALITY PAINT

OVER 300 000 ORIGINAL (OEM) COLORS AVAILABLE.

PRODUCT CONTAINS A MAXIMUM CURING AGENT OF QUALITY EQUIVALENT TO MANUFACTURER (OEM)

YOU CAN KEEP IN STOCK WITHOUT ANY CONCERNS.

The quality of a two component painting in one spray.

When a repair requires the addition of a curing agent for paint, Genicolor offers the perfect solution with its aerosol 2K PROFESSIONAL SERIES.

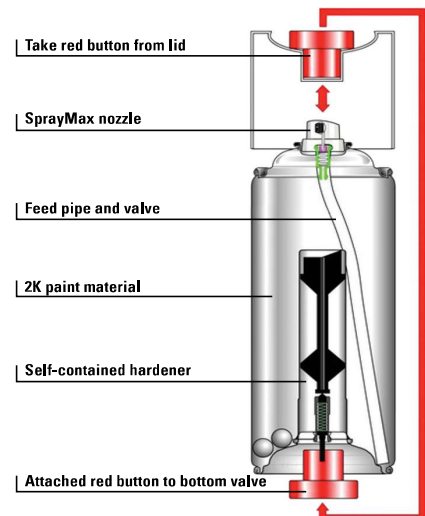

The catalyst contained within a separate compartment within the aerosol reaches a level of curing equivalent to the standards of automobile manufacturers.

The components are mixed the moment you press the activator on the can. Once mixed, the spray must be used within 8 hours. As activation accelerates the curing process, the aerosol can only be used during this period.

SAVE BY AVOIDING EXPENSIVE TRIPS TO THE AUTO-BODY SHOP

Contains 12 OZ
